China adopted a republican form of government in November, 1911, after revolution which started in the south and which was largely engineered by Dr. Sun Yat Sen, the first provisional president. As a result of internal dissension Yuan Shi Kai decided that the people would be ruled better under a monarchial form of government.

Pekin. Dec. 11.—Yuan Shi Kai, president of the Chinese republic, has accepted to the throne of China, which was tendered to him by the council of state, it was announced today.

The time when the form of the Chinese government shall be changed from republican to monarchial has not yet been set.

Although Germany, France, and English days [and have led the United States in mine rescue apparatus, this country will in a few days [unp into front rank with a more improved device that has been perfected by a young employe of the Burrau of Mines here in Washington. This information was given out at the meeting of the Mississippi Society last night when Dr. Van H. Manning, director of the bureau, spoke.

The chief part of the entertainment consisted of motion pictures. M. L. Leo-pold, of the Bureau, operated the ma-

Engineers Will Recommend One Form of Plate to Eliminate Present Difficulties.

One of the most important considera-tions in connection with proper adminis-tration of automobile regulations is that of ensuring clear and unmistakable iden-tification for every vehicle on the road. This is the motto of seliers of the little stickers. The public is listening to the appeal, and the number of sales steadily is increasing. Many thousands of the stamps already have been disposed of and the demands seems to be growing.

Woman Injured by Car.

Mrs. V. Shaw. 47, of 628 Twelfth street northwest, was struck yesterday by a street car at Twelfth street and Pennsylvania avenue northwest. She was removed to Emergency Hospital and treated for scalp wounds bruises and shock.

While the laws of most States are substantially in agreement in requiring the ast plate, their varying interpretations of the necessary conditions has bred a state of confusion that is not only distanteful to the public, but is in a measure subversive of the purpose of the official marker. The lack of uniformity in license plates also is distanteful to automobile makers. Recognizing the need of harmonizing such minor differences in the plates as have no particular bearing on the legal requirements of the license question, the Society of Automobile Engineers is just concluding an investigation of the subject and at its forthcoming winter meeting. While the laws of most States are subring, which is to be held in New York City, January 5 and 6, will offer for ac-ceptance by the authorities a standard form of plate that has been designed with a view to eliminating present diffi-
